

HULL Lounge Chair

Features:

Designed from the inside out, Hull is incredibly efficient in both form and construction. Hull was named after its intricate form which is inspired by traditional boat building construction. Constructed from a single sheet of eco plywood, the Hull's lozenge shaped form tapers in all directions creating a minimal, slim lounge with subtle curves, ensuring maximum comfort. With its seamless upholstery, the Hull lounge avoids the appearance of any visible zips or fittings.

Hull is 100% made in Australia.
